Alexandria VA 22313-1450

STATEMENT OF SUBSTANCE OF INTERVIEW UNDER 37 C.F.R. §1.133(b)

Sir:

An Examiner's interview was conducted on August 29, 2007 between Examiner George C. Neurauter and Thinh Nguyen, Applicant's representative at the request of Applicant's representative.

The following is a Summary of the Substance of Interview in compliance with 37 C.F.R. §1.133(b) and MPEP 713.04.

(A) Brief description of the nature of any exhibit shown or any demonstration conducted:

None.

(B) Identification of the claims discussed:

Independent claims 1, 9, 16, and 21 were discussed.

(C) Identification of the specific prior art:

The prior art references discussed are U.S. Publication No. 2002/0150100A1 issued to White ("White"), and U.S. Patent No. 5,828,835 issued to Isfeld ("Isfeld").

(D) Identification of the principal proposed amendments of a substantive nature:

Applicant's representative faxed an agenda of the interview outlining the issues on July 25, 2007. The agenda includes the three principal items of discussion: (1) control information appended to end of the first data segment; (2) first frame segmentation indicator, frame fragment

Appl. No. 09/823,127
Rule §1.133(b): Statement of Substance of Interview
Filed September 21, 2007

sequence number, and channel number; and (3) extension indicator as recited in claims 8, 15, 20, and 28.

(E) The general thrust of the principal arguments:

Applicant's representative submitted that White does not disclose or render obvious the control information appended to the end of the first data segment. Applicant's representative further pointed out that the appending of the control information to the end of the data segment promotes the transmission of the high priority frames over the low priority claims, as provided in the Specification on page 6, lines 18-22; page 11, lines 3-14; and Figures 5 and 6.

Applicant's representative also indicated that the fact that White disclosed both the header and the trailer indicate that White was well aware of the position of the control information by disclosing the use of the header and the trailer. However, since White did not recognize using the trailer to contain the control information including the frame identification, it was not obvious to White.

Applicant's representative further indicated that neither White nor Isfeld discloses or renders obvious (a) a first frame segmentation indicator; (b) a frame fragment sequence number, and (c) a channel number as recited in claims 1, 9, 16, and 21. In addition, Applicant's representative pointed out that Isfeld merely discloses bits to determine the channel over which the message is received, not transmitted.

In response to the arguments presented by Applicant's representative, the Examiner indicated that Applicant's arguments may be included in the response to the Final Office Action.

(F) General indication of any other pertinent matters:

The Examiner recommended filing an after-final response discussing the difference(s) specifically and perhaps amending the claim(s) to bring out the difference(s). The Examiner indicated that the Examiner may do further search to find new prior art references.

(G) General results or outcome of the interview, if appropriate:

Although no agreement was reached regarding allowability, it is understood that amendments to the claims would be filed and the Examiner will consider allowance.

(H) Interview via electronic mail:

Not applicable.
